Check Out Fibredust “Blocks” of Growing Media

Amazingly Convenient

Our core product, the Fibredust 5 kg coir block weighs 11 lbs, measures 12" X 12" X 6" and is conveniently wrapped for retail sale and carry away. It's built in handle makes for an easy grab from display or shelf.

This relatively small package expands, when water is added, and delivers an amazing punch: It is the **equivalent to 2.5 Cu Ft of growing media**. Compare this to a 40lb bag of soil!

The texture is rich and loamy. Coco Coir is weed and fungus free, has a neutral pH, absorbs water like a sponge, and drains like a dream.

ONE block fills a wheel barrow

10 Blocks = 1 Cubic Yard

And fits in the trunk of a car!
