

Coco Coir Flat Grow Bags

Coir “lay flat” grow bags are widely used in greenhouse vegetable production. Fibredust’s four proprietary blends have the versatility to provide the right growing conditions for any greenhouse technology, and any crop.

Sizes:

100 X 15 X 10 cm

100 X 20 X 10 cm

Custom

3 Levels EC

High 2.5

Low .8

Buffered .5

pH

5.5 to 6.5

True

Consistant Moisture Holding

Our proprietary tried and “true” blend, designed for moisture retention. True Grow bags possess a forgiving nature, retaining more than a days supply of moisture while at the same time, never over saturated. Moisture retentive with great drainage is the perfect combo for many cultivation methods and crops

Action

Aggressive Draining, Retention

Action grow bags deliver results in greenhouses where the grower needs a more aggressive irrigation fertigation schedule. Coir pith provides moisture and root contact while coir chips foster drainage and circulation through the rootzone.

SuperChip

Multi Irrigation Cycles Welcome

If your growing method involves multiple irrigation cycles per day, super chip is the coco coir grow bag you want in your greenhouse. Extreme flow through with no oversaturation is the feature of these growbags. Intense fertlizer schedules reward growers with massive root formations, healthy productive plants

Berry Blend

Strawberry Special Blend

Strawberry substrate needs are all met with our heavy pith blend that delivers the moisture berries need without being soggy. Blend your Nutes and set up fertigation schedule knowing your strawberry root system is embraced by just the right texture to thrive.

Coco Coir Flat Grow Bags

Ordering Info

1. Choose Product Blend
True - Action - Superchip - Berry

2. Choose Bag Size
100 x 15 x 10, 100 x 20 x 10 or specify custom size

3. Choose desired EC
High - Low - Buffered

For Container Orders

Specify plant hole and drainage hole configuration

Load Specifications

Container load and pallet load sizes vary with bag size.

100 x 15 x 10 10,000 per 40HC

100 x 20 x 10 9,000 per 40 HC

Custom Sizes: quantity received at quote

Installation

The versatile nature of lay flat growbags allow installing on the ground, suspended in gutters or troughs, or elevated table tops. The critical aspect of installation is the need for providing slope for irrigation collection or runoff. Without slope irrigation water and nutrients will pool around bags. Slope can be provided by earth grade, floor grade or suspension levels and should be a minimum of 1.5%.

About FibreDust

FibreDust is a leading producer of coco coir products with worldwide market penetration in agriculture, horticulture, and soil blending. Our product lines include coir block, coir brick, coir disc, grow bags, twine, erosion control and more. All are produced in our owned factories in India and Sri Lanka. Our USA sales office and warehouses are located in Cromwell CT USA
