

LEADER IN COIR

About Fibredust

Fibredust is a global leader in coco coir growing media production and distribution. The heart of coir country in India and Sri Lanka is home to our multiple factories. Offices, warehouse and sales operations are located in Cromwell CT. USA.

Fibredust products include many forms of coco coir used for hydroponic farming and growing, compressed blocks, bricks, bales, flat growbags for greenhouse production, 5 gallon and 3 gallon grow bags, coir discs for seed germination and for other growing products. Fibredust welcomes custom orders and provides private label services for many industry leaders.

Sam Ahilan CEO of Fibredust LLC, who came from Sri Lanka is one of the pioneer for the agricultural use of coco coir. He is instrumental in introducing coir growing media to both agriculture and soil blending in the United States. His expanding operations include Enroot Products LLC, specializing in innovative garden products, packaged for retail sale to the gardening market in the USA and beyond.

Wood Fiber Coir Mix

New Product

- Wood fiber, produced from steam friction of wood, is a very efficient organic substrate for hydroponics
- A proprietary blend of Wood Fiber and Coco Coir that provides High Air Porosity and excellent Water Retention
- More expanded growing medium per pallet
- Available in Bricks, Blocks and various size Grow Bag forms
- Low EC and pH Neutral

True Blue for Blue Berries

New Product

We have 3 options:
Unwashed - EC -2.5
Washed - EC -1
Buffered - EC -.5 (washed with $\text{Ca}(\text{NO}_3)_2$)

Compressed coir blocks are staged in upright 30cm x 30cm poly grow bags that quickly expand to 27 liters. True Blue grow bags contain a proprietary coir blend that includes coco coir, coco chips and coco fiber fostering a well-drained highly oxygenated environment preferred by blueberry plants.

Enroot Products LLC

EnRoot Products LLC is a subsidiary of Fibredust LLC catering to Retail and Direct home consumers. Enroot Products is an innovator within the Home and Garden industry.

Our Trademarked Seed Stitcher Tools brought us to the forefront of professional turf repair and easy flower / garden bed and border seeding. It was an instant hit with professional lawn care companies and homeowners alike.

Our Spongease Branded compressed coco coir potting soil brings our professional growing media to consumers in convenient retail packaging. Garden centers can now introduce the magical expanding coir potting mix to their customers in easy-to-try sizes. Home gardeners love the convenience of purchasing a quality home potting soil in a compact, easy to store package that readily expands to usable quantities!

The GreenEase microgreen pads and kits give home growers a quick easy option for growing their own microgreens at home. Some of our customers are even using our microgreen kits commercially, and delivering live growing greens to their restaurant chefs.

The RootEase Branded line of root pruning fabric pots, make gardening anywhere, even on roof tops, balconies, and rocky unproductive soil... easier, faster and better! Just open, fill and plant!

Live Mulch Branded coupled with the Seed Stitcher, or used on it's own, creates instant borders of colorful flowers in blends that please all!

For wholesale purchasing information, please contact us using the form on the contact us page.

More innovations sure to follow! Stay with us!
